

# A NEW GENERATION of AK Ramon machines

A unified digital experience for vacuum packers, tray sealers and bowl cutters.

**+ Touch-screen Technology**  
New tactile interface for a clearer working experience.

**+ Test Screen**  
Preview your system's performance with a diagnostic test screen.

**+ Program Memory**  
Store up to 100 programs with associated product images for easy reference.

**For further information, get in touch with our team**

**AK Ramon introduces a touch-driven interface across its core machines, bringing predictability and simplicity to daily production.** Vacuum packers, tray sealers and bowl cutters now work under the same digital logic, offering operators and technicians a clearer and more reliable way of working.

## Vacuum Packers | Vac Line

- + 7" touch display
- + Up to 100 programs with product images
- + Sensor-based and time-based vacuum cycles
- + Diagnostic test screen for inputs, outputs and vacuum readouts

## Tray Sealers | Sealing Line

- + Touch displays from 4.3" to 7", depending on configuration
- + Program memory ranging from 10 to 100 programs, with product images available on advanced models
- + Digital control of sealing time, temperature and gas
- + Integrated diagnostic tools for faster troubleshooting

## Bowl Cutters | Food Processing Line

- + Integrated touch-screen interface
- + Program saving for the first time
- + Unified digital workflow shared with the rest of the line
- + More predictable and consistent processing
